

Indoor waste separation station h770_12

Three-compartment bin in painted steel, ideal for waste separation. Dimensions: W 69 x D 25 x H 65 cm. Capacity: 90 L.

The **h770_12 trapezoidal waste separation bin** is a practical and efficient solution for managing waste separation in offices, schools, hospitals, hotels, and public spaces. Thanks to its solid structure in **painted steel** with epoxy powders, it ensures **resistance** to impacts and wear, guaranteeing long-lasting durability even in high-traffic environments. Its modern and functional design, with **rounded safety edges**, combines aesthetics and safety, making it suitable even for contexts that require special attention to image, such as offices or hotel lobbies.

With a **total capacity of 90 liters**, divided into three compartments of **30 liters each**, it allows for **orderly management** of waste separation, facilitating the sorting of plastic, paper, organic, and other waste. Each compartment is separated by a robust **steel sheet**, which ensures that different types of waste do not mix. The **removable lid**, also made of painted steel, is equipped with **three distinct holes** to facilitate waste insertion into the different compartments. This mechanism not only keeps the surrounding area clean but also makes the disposal process more intuitive for users.

The bin is equipped with **removable steel bag holders**, which allow for easy management of waste bags, making hooking and removal operations simple and quick. At the base, there are **foam pads** that protect the floor from scratches or marks, maintaining the integrity of the surfaces on which the bin is placed.

In addition to its advanced technical features, the bin complies with the **Minimum Environmental Criteria (CAM)**, ensuring it meets environmental regulations and promotes sustainability. Compliance with CAM makes this product a perfect choice for those looking for **eco-friendly** solutions and wanting to contribute to reducing environmental impact in workplaces or public areas.

Don't wait any longer: choose the **h770_12 trapezoidal waste separation bin** today and ensure a cleaner, more orderly, and more sustainable environment. This bin is perfect for offices, schools, hotels, and other public spaces. Contact us for a personalized quote or for more details on quantities. Invest in a practical and ecological solution that simplifies waste separation!

- **Total capacity:** 90 L (3 x 30L)
- **Dimensions:** W 69 x D 25 x H 65 cm
- **Sheet thickness:** 1 mm
- **Removable lid** with three distinct holes
- **Removable steel bag holders**
- **Rounded edges** for safety
- **Foam pads** for floor protection
- Product compliant with **CAM** minimum environmental criteria

User benefits:

- **Facilitates waste separation** with three distinct compartments
- **Robust design** and resistant, ideal for high-traffic environments
- **Floor protection** thanks to foam pads

- **Easy management** of bags thanks to removable bag holders
- **Eco-sustainable choice** thanks to CAM compliance
- **Simple to clean** and maintain

FAQ:

1. Where can this bin be used?

The bin is ideal for indoor environments such as offices, schools, hospitals, shopping centers, and other high-traffic areas.

2. How are the bags replaced?

The lid lifts easily and the removable bag holders allow for easy hooking and removal of the bags.

3. What environmental certifications does the product have?

The bin complies with the **Minimum Environmental Criteria (CAM)**, ensuring an environmentally friendly choice.

4. Are adhesive graphics included?

No, adhesive graphics are not included; upon request and subject to a quote, it is possible to purchase adhesive graphics depicting the type of waste.

Mini buying guide:

If you are looking for a waste separation bin for indoor spaces such as offices, common areas, or commercial environments, it is essential to consider some key aspects before purchasing. First of all, evaluate the **capacity**: this **90-liter** bin, divided into three compartments of 30 liters each, is ideal for those who need **orderly** and practical waste management.

The **material** is equally important: painted steel with epoxy powders guarantees not only **strength and durability**, but also a clean and modern aesthetic appearance. Also consider the ease of use: the **removable lid** and **removable bag holders** ensure a simple and fast maintenance experience, ideal for environments with high pedestrian traffic.

Finally, check that the product is **compliant with environmental regulations**, such as **CAM**, if sustainability is a fundamental criterion in your choice. Choosing a bin that meets these requirements helps reduce environmental impact and demonstrates a commitment to more sustainable business practices.

90L waste separation bin, three-compartment bin, office waste separation bin, steel waste bin, CAM bin for offices, sustainable waste collection bin, city grey painted bin, ecological steel bin.
