

Indoor waste sorting bin h326_83

Waste sorting bin for separate collection. Material: polypropylene. Capacity: 70 lt. Available with lids in different colors based on the type of waste.

Waste sorting bin, specifically for indoor use. Ideal for shopping centers, offices, schools, hospitals. **Easy to clean and very lightweight** so as to make cleaning and handling operations easy. Consisting of a **cellular polypropylene structure**, 3 mm thickness, particularly **resistant to impacts, water, grease and solvents**. It consists of a body with **side handles and several ventilation holes** that allow the water contained in wet waste to evaporate easily, reducing its weight and eliminating bad odors; these holes are also very useful for checking when it is necessary to empty the container and replace the bag inside. The body is complete with an **easily unlockable lid, available in various colors** based on the type of waste to be inserted.

Technical features:

- Dimensions: W.26 x D.36 x h.78 cm
- Capacity: 70 lt
- Weight: approx. 1 kg
- Material: cellular polypropylene (PP), 3 mm thickness
- Side handles
- Ventilation holes
- White body
- Lid available in various colors

****N.B.:** when ordering, please specify the desired type of waste to be combined with the chosen lid color

INFORMATION

- Height in millimeters 780.000000
- Width in millimeters 260.000000
- Depth in millimeters 360.000000
