

Indoor waste sorting bin h957_46

Stainless steel waste sorting bin 30 L, with pedal and lid. Dimensions: Ø 29 x H 63 cm.

The **H957_46 waste sorting container** is the ideal solution for efficient and orderly management of **organic waste in indoor environments**. Made of 0.4 mm thick **AISI 430 stainless steel**, it is designed for use in **offices, canteens, schools, professional kitchens and community spaces**, where hygiene, durability and clarity in waste identification are essential.

With a **capacity of 30 liters**, the container is equipped with a **lid with pedal opening**, to allow hands-free use and prevent the spread of germs. The product features **blue RAL 5005 adhesive labels**, positioned on both the front and the lid, which clearly identify the content intended for **paper collection**, according to the most common color conventions.

Inside there is a **removable polyethylene bucket**, which facilitates emptying and daily cleaning. The **black plastic hinges and finishes** complete the design, offering a touch of sober elegance. The structure is tested to **resist abrasion and impacts**, and certified according to **fire stability** regulations, guaranteeing high performance even in high-use environments.
