

Industrial bumper h439_19

U-shaped yellow-black steel bumper for indoor use. Dimensions: W 270 x D 205 x H 400 mm.

The **h439_19 industrial U-shaped bumper** is a crash protection designed to **secure structures, shelving, equipment, and sensitive areas** in warehouses, industries, and indoor transit zones.

Made of **5 mm thick powder-coated steel**, it guarantees **high impact resistance** from forklifts, pallet trucks, and other warehouse vehicles. Its **U-shape** and **high-visibility yellow-black coloring**, with black signaling stripes, help to delimit safety areas and prevent accidents.

The bumper measures **W 270 x D 205 x H 400 mm**, with an **internal leg width of 160 mm**, and is designed for **floor fixing via bolting** (mounting material not included). It features **4 mounting holes** and a base of **55 x 200 mm** with a height of **5 mm**. The structure is **pre-assembled** for **quick installation**.

TÜV certified according to the **DGUV 108-007 (formerly BGR 234)** standard, it is ideal for **industrial indoor environments** where protection from accidental impacts is required.

Buy your **h439_19 industrial U-shaped bumper** now! Protect columns and transit areas with a **certified and resistant barrier**. Order today or **contact us for a customized quote** if you need to secure multiple locations in your facility. Safety starts here!

Technical features:

- **Material:** Powder-coated steel
- **Steel thickness:** 5 mm
- **Color:** Yellow with black markings
- **Shape:** U-shaped
- **Height:** 400 mm
- **Total width:** 270 mm
- **Depth:** 205 mm
- **Internal leg width:** 160 mm
- **Width without base plate:** 170 mm
- **Depth without base plate:** 200 mm
- **Base:** 55 x 200 x H 5 mm, yellow color
- **Net weight:** 6.74 kg
- **Field of application:** Indoor use
- **Assembly:** Floor bolting (material not included)
- **Delivery:** Pre-assembled
- **Number of mounting holes:** 4
- **Certifications:** TÜV – compliant with DGUV 108-007
- **Warranty:** 1 year

User benefits:

- **Effective protection:** of structures and systems from accidental impacts.
- **High visibility:** thanks to the yellow-black coloring.
- **Easy installation:** pre-assembled.
- **Certification:** TÜV for safety.
- **Ideal for indoor use:** in industrial environments.

FAQ:

1. **Is this bumper suitable for outdoors?**
No, it is designed for indoor use on solid floors.
2. **Is the fixing material included?**
No, it must be purchased separately.
3. **Is it already assembled?**
Yes, it is delivered pre-assembled for quick installation.
4. **Is it safety certified?**
Yes, it is TÜV certified according to the DGUV 108-007 standard.
5. **How many fixing bolts are required?**
The product has 4 mounting holes for secure fixing.

Purchase mini-guide:

If you manage a warehouse, a production area, or any industrial environment where forklifts, pallet trucks, or industrial vehicles circulate, you know how important it is to protect structures, columns, and personnel from accidental impacts. The h439_19 U-shaped bumper is the ideal solution to **increase safety and prevent costly damage**.

This protection is designed to delimit and defend high-risk areas, such as load-bearing columns, shelving, access point columns, or dangerous transit zones. Its **U-shape** allows it to safely wrap around structures, ensuring optimal impact absorption on three sides.

Before proceeding, check the **dimensions of the structures to be protected** and make sure to choose the model with the **correct internal and external measurements**. Also consider purchasing the **FIX 1 fixing kit**, if you do not already have it available.
