

Industrial container 240 lt h836_38

240-liter perforated industrial HDPE container. Dimensions 120x80x41 cm, certified for food with peel and stackable for professional use.

The **industrial container H836_38** is a technical solution designed for the storage, handling, and preservation of solid products, with a specific focus on the food sector. Made of **HDPE (high-density polyethylene)**, this container guarantees high mechanical resistance and hygienic compliance for use in **farms, logistics platforms, and food industries**. Its **perforated structure** is essential to ensure constant ventilation of perishable products and allow the rapid discharge of any liquids, preventing stagnation and spoilage.

Technical features

- **Capacity:** 240 liters
- **External dimensions:** L 120 x W 80 x H 41 cm
- **Internal dimensions:** L 114 x W 75 x H 27.5 cm
- **Material:** HDPE (High-density polyethylene)
- **Configuration:** Perforated walls and bottom for ventilation and drainage
- **Handling:** Integrated handles for manual grip and base compatible with mechanized systems
- **Color:** Green
- **Certification:** Suitable for contact with food with peel
- **Storage:** Stackable and superimposable structure at full load
