

Industrial hot air generator h958_19

Professional 2 kW electric fan heater in stainless steel. Portable and compact, ideal for 24h continuous heating in industrial environments.

The **H958_19 hot air generator** is a portable electric fan heater designed for the efficient heating of small and medium-sized industrial environments. The robust **stainless steel** structure with a rectangular design and high-visibility yellow finish makes it suitable for use in demanding contexts such as **construction sites, workshops, and warehouses**. The device is engineered to support intensive work cycles, ensuring uninterrupted operation **24 hours a day**.

Technical features

- **Thermal power:** Adjustable on two levels (2 kW / 1 kW)
- **Airflow:** 140 m³/h
- **Maximum outlet temperature:** 43°C
- **Thermostatic regulation:** Range from 0 to 40°C
- **Housing material:** Corrosion-resistant stainless steel
- **Safety:** Safety thermostat with manual reset against overheating
- **Mobility:** Ergonomic upper handle
- **Dimensions:** 18.5 x 28.5 x 17.5 cm
- **Net weight:** 2.6 kg
- **Color:** High-visibility industrial yellow
