

Industrial metal container with skids h746_18

Industrial sheet steel container 80x60x40 cm, load capacity 800 kg. Reinforced structure with skids for intensive storage and stackability.

The **shaped sheet metal industrial container** is a solution designed for the logistical management of semi-finished products, mechanical components, and production waste in intensive production contexts. The reinforced steel structure ensures high mechanical strength, solving problems related to material deformation under heavy loads and guaranteeing a long operational life in the most demanding environments.

Technical characteristics

- **Material:** Shaped and reinforced sheet steel
- **Nominal load capacity:** 800 kg
- **Dimensions:** 80 x 60 x 40 cm
- **Support system:** Skids on the long side for greater stability
- **Stackability:** 1+3 configuration (up to 4 stacked containers)
- **Foot height:** 13 cm (clearance for handling)
- **Color:** Green RAL 6011 (industrial finish)
