

Industrial spill containment pallet h874_21

Steel spill containment pallet with a collection capacity for 2 drums of 60 liters. Dimensions: W 940 x D 500 x h 1075 mm.

The **industrial spill containment pallet h874_21** is designed to ensure the safe and compliant storage of up to **2 drums of 60 liters** in a vertical position (**drums not included**). This solution is particularly suitable for industrial or professional environments where it is necessary to contain any leaks of hazardous liquids and ensure safety at work.

The structure of the pallet is made of **3 mm steel sheet**, which ensures robustness and durability over time, even under intensive use conditions. The galvanized grid, with a load capacity of **1000 kg/m²**, is designed to safely support the drums during storage. The pallet is equipped with a practical handling system thanks to **2 swivel wheels (one with brake) and 2 fixed polyamide wheels** with a diameter of Ø 100 mm, and a convenient **push handle** that allows easy transport even in confined spaces.

With a collection capacity of **61 liters**, the tray is capable of containing any liquid spills, ensuring a safe and clean working environment. Its compact dimensions (**W 940 x D 500 x h 1075 mm with push handle**) make it versatile and suitable for various industrial contexts. Upon request, following a quote, it is possible to customize the pallet with different RAL colors or choose a galvanized version for greater corrosion resistance.

Ensure the safety and compliance of your work environment with the **industrial spill containment pallet h874_21**. **Order now** and choose a robust and practical solution for your industrial storage!

Technical features:

- **Storage capacity:** maximum 2 drums of 60 liters (not included)
- **Structure material:** 3 mm steel sheet
- **Grid material:** galvanized, load capacity 1000 kg/m²
- **Collection volume:** 61 liters
- **Pallet dimensions:** 800 x 500 x h 415 mm
- **Dimensions with push handle:** W 940 x D 500 x h 1075 mm
- **Weight:** 39 kg
- **Wheels:** 2 swivel wheels (one with brake) and 2 fixed polyamide wheels Ø 100 mm
- **Push handle:** included
- **Color:** as shown in the photo

User benefits:

- **Guaranteed safety:** designed to contain industrial liquid leaks, improving the safety of the work environment.
- **Practical handling:** swivel wheels and push handle facilitate transport even in confined spaces.
- **Durability:** high-quality materials, resistant to wear and intensive use conditions.
- **Containment capacity:** collection volume of 61 liters to ensure compliance with safety regulations.
- **Customization:** possibility to request, following a quote, RAL colors or galvanizing to adapt to different industrial needs.

FAQ:

1. **What liquids can be stored in the pallet?**

The pallet is designed to hold drums storing industrial liquids, including oils, solvents, and other chemicals that are non-corrosive to steel.

2. **Is it possible to use the pallet for storing food substances?**

No, the pallet is designed to contain drums with industrial liquids such as oils or solvents; it is not suitable for food substances.

3. **Are the wheels suitable for transport on uneven ground?**

Polyamide wheels are better suited for flat and stable surfaces. On uneven ground, it is recommended to move the pallet carefully to avoid instability.

4. **How is the maintenance of the pallet performed?**

The pallet can be cleaned with neutral detergents and water. It is recommended to periodically check the integrity of the structure to ensure optimal performance.

5. **Is it possible to transport the pallet at full load?**

Yes, the polyamide wheels with brake and the push handle allow for safe movement even at full load.

Mini buying guide:

Opting for the **industrial spill containment pallet h874_21** means choosing a safe and reliable solution for your industrial storage. This product is particularly suitable for those working in sectors that require attention to the management of hazardous liquids, such as the chemical and mechanical industries.

Made of **resistant steel sheet** and equipped with a galvanized grid, the pallet ensures durability and functionality even under intensive use conditions. Thanks to its compact design and swivel wheels, handling is simple and practical. Furthermore, the possibility to customize the color or opt for a galvanized version makes it a versatile choice for different needs.

Before proceeding with the purchase, consider the required storage capacity and verify that the dimensions are compatible with your workspace. Investing in safety has never been so easy: choose the h874_21 pallet for safe and efficient containment!
