

Industrial spill pallet for liquids h874_38

Industrial spill pallet for storing up to 2 x 200-liter drums, made of resistant steel, with a base in galvanized profiles. Dimensions: 1200 x 800 x h 360 mm.

The **industrial spill pallet h874_38** is a solution designed for the safe and organized storage of industrial liquids in containers up to **2 x 200-liter drums**. Built in **3 mm steel sheet**, it guarantees high resistance for intensive and long-lasting use.

The **base**, made with **hot-dip galvanized profiles**, offers robust support and optimal protection against corrosion, ensuring a long life even in demanding industrial environments. The **stackable** design allows for optimization of storage space and facilitates handling and logistics management.

With a **lifting height** of **100 mm**, the tray is easily transportable via pallet truck or forklift, making handling operations practical and safe. The **collection volume** of **224 liters** ensures the efficient management of any spills or leaks.

The tray is designed to withstand a **maximum load** of **600 kg** and is finished in **RAL 5012** color for perfect integration into industrial environments. Upon request and following a quote, other RAL shades or a galvanized model are available for specific operational needs.

Ensure safe and organized storage with the **spill pallet h874_38**! Choose quality and practicality for your industrial activity. **Order now** and optimize your workspace!

Technical features:

- **Dimensions:** 1200 x 800 x h 360 mm
- **Maximum capacity:** 2 x 200-liter drums
- **Sump capacity:** 224 liters
- **Material:** 3 mm steel sheet
- **Base:** hot-dip galvanized profiles
- **Lifting height:** 100 mm
- **Load capacity:** 600 kg
- **Weight:** 64 kg
- **Color:** RAL 5012
- **Stackable model**

User benefits:

- **High resistance:** steel structure designed for intensive industrial use.
- **Optimal protection:** hot-dip galvanized base for increased durability against corrosion.
- **Flexible management:** stackable design to optimize storage space.
- **Easy handling:** compatible with pallet trucks and forklifts.
- **Guaranteed safety:** large collection volume to manage spills and leaks.

FAQ:

1. **What are the main applications of this spill pallet?**

It is ideal for the storage and safe management of industrial liquids in production or logistics environments.

2. **Can the tray be used outdoors?**

Yes, thanks to the hot-dip galvanized base, it offers good resistance to atmospheric agents.

3. **Is it compatible with different types of drums?**

The tray is designed to hold up to 2 x 200-liter drums in a vertical position.

4. **How is the pallet moved?**

It features a lifting height of 100 mm, allowing transport via pallet truck or forklift.

5. **What is the maximum supported load?**

The tray can support up to 600 kg, ensuring safety during storage.

Short buying guide:

Choosing an **industrial spill pallet** like the **h874_38** model means investing in a reliable, practical, and safe solution for managing industrial liquids. This product is ideal for the **containment of hazardous liquids** and for the **safe storage of industrial drums** up to 200 liters, complying with high environmental safety standards.

Thanks to the **3 mm steel sheet** structure and the base with **hot-dip galvanized profiles**, the tray offers **exceptional durability**, resisting daily wear and mechanical stress. The **stacking** capability allows for space optimization during transport and storage, while the 100 mm lifting height enables easy handling via pallet truck or forklift.

This tray is particularly suitable for industrial environments requiring secure and robust solutions for managing oils and other potentially polluting liquids. The **224-liter** collection capacity and **reinforced design** make it suitable even for intensive use. The **maximum load of 600 kg** ensures versatile and reliable use.

Before purchasing, consider compatibility with your drums and check the space available for installation. With the **h874_38** model, you choose a product that combines functionality, safety, and respect for the environment.

Investing in an **industrial collection tray** means adopting a solution that helps you comply with safety regulations and protect your working environment.
