

Industrial storage sump for liquids h874_39

Steel sump for safe storage of industrial liquids, suitable for 4 x 200-liter drums. Dimensions: 1200 x 1200 x h 285 mm.

The **h874_39 industrial liquid storage sump** is a robust and versatile solution for the safe storage and containment of **liquids** or pollutants. Designed to accommodate a maximum of **4 x 200-liter drums**, this sump is made entirely of **3 mm steel sheet**, guaranteeing excellent resistance to impacts and mechanical stress.

The structure is equipped with a **base** composed of **hot-dip galvanized profiles**, which not only improve stability but also offer additional protection against corrosion. The **lifting height of 100 mm** allows for quick and safe handling using pallet trucks or forklifts, while the **stackable** functionality optimizes space during transport or storage.

With a **collection volume of 230 liters**, this sump represents an ideal choice for managing oils, solvents, and other liquid substances in industrial environments. The **maximum load capacity of 1200 kg** makes it perfect for heavy-duty use, ensuring safety and operational efficiency.

The **RAL 2000** finish offers additional protection and greater visibility, facilitating the identification of the sump in warehouses or production sites.

Ensure a safer work area with the **h874_39 storage sump**, designed to offer durability, efficiency, and environmental protection. **Order today** and optimize the management of your industrial liquids!

Technical specifications:

- **Dimensions:** 1200 x 1200 x h 285 mm
- **Collection volume:** 230 lt
- **Load capacity:** 1200 kg
- **Maximum capacity:** 4 drums of 200 lt
- **Structure material:** 3 mm steel sheet
- **Base:** hot-dip galvanized profiles
- **Lifting height:** 100 mm
- **Stackability:** yes
- **Weight:** 77 kg
- **Color:** RAL 2000

User benefits:

- **Safe storage:** Ideal for containing and managing liquids or pollutants.
- **Durability:** Robust steel structure with galvanized base for a long service life.
- **Operational efficiency:** Stackable design to optimize transport and storage space.
- **Easy handling:** 100 mm lifting height, perfect for pallet trucks or forklifts.
- **Guaranteed safety:** High load capacity and resistance to heavy-duty use conditions.

FAQ:

1. **How many drums can this sump hold?**

The sump is designed to hold a maximum of 4 drums of 200 liters each.

2. **How is the sump moved during operations?**

The sump is equipped with a lifting height of 100 mm which allows for easy handling via pallet truck or forklift.

3. **Is it suitable for containing solvents or oils?**

Yes, the sump is ideal for the safe management of industrial liquids such as oils, solvents, and hazardous substances.

4. **Is it possible to stack multiple sumps?**

Yes, the stackable design allows for space optimization, making this sump also suitable for complex storage setups.

5. **What is the weight limit supported by the sump?**

The maximum load capacity of the sump is 1200 kg, ideal for heavy-duty use.

Buying guide:

Investing in the **h874_39** industrial liquid storage sump means ensuring efficient and safe management of **liquid substances** in industrial environments. Thanks to its **3 mm steel sheet** structure and base with **hot-dip galvanized profiles**, this sump offers **superior durability and safety**, even in heavy working conditions.

The **capacity to hold up to 4 x 200-liter drums** makes it perfect for companies needing reliable solutions for the **containment of oils, solvents, and chemicals**. The **stackable design** and 100 mm lifting height improve space efficiency and facilitate transport and storage.

Before purchasing, ensure that the dimensions of the sump are compatible with your operational needs and the installation area. This product represents an optimal choice for those looking for **robustness, practicality, and compliance with environmental safety regulations**.
