

Information panel for public spaces h350_100

Lectern for urban furniture in galvanized steel and polycarbonate, 48x55x125 cm, robust structure for historic centers and public spaces.

Lectern designed for the furnishing of public spaces such as historic centers, squares, and streets. The structure combines essentiality and elegance, ensuring a solid visual presence in urban contexts. Made entirely of galvanized steel, the product ensures resistance to weathering and durability over time, a critical element for permanent or semi-permanent outdoor installations.

The load-bearing structure consists of **galvanized steel round tube** with a section of Ø40 mm and Ø30 mm, supplemented by rectangular tubular crossbeams (20x10 mm) for reinforcement. The panel support is made of **20/10 mm thick press-folded sheet metal**, a solution that combines rigidity and low weight. The information panel is made of **polycarbonate**, a transparent material that allows visibility of contents while maintaining mechanical protection.

The oven-baked painting at 180°C guarantees optimal adhesion and resistance to abrasion. The lectern is **designed for ground anchoring**, simplifying installation and ensuring stability in exposed environments.

Technical features

- **Frame material:** Galvanized steel (Ø40 and Ø30 mm tube)
- **Crossbeams:** 20x10 mm rectangular tubular
- **Panel support:** 20/10 mm thick press-folded sheet metal
- **Panel:** Transparent polycarbonate
- **Dimensions:** 48 x 55 x h. 125 cm
- **Weight:** 8 kg
- **Treatment:** Oven-baked painting at 180°C
- **Anchoring:** Designed for ground fixing

Image purely indicative

INFORMATION

- **Height in millimetres** 1250.000000
