

Information panel for street furniture h109_274

Information lectern for street furniture in galvanized steel, 800×540×2000 mm, to be bolted down, with bent base and reinforcements. Screen-printed panel not included.

Information lectern for street furniture designed for fixed installations in public spaces, made with **bent galvanized steel sheet** to ensure a stable supporting base suitable for floor anchoring. The structure is painted and equipped with **welded reinforcement brackets** according to the height, ensuring rigidity and durability over time.

Lettering and graphic content are applied via **screen printing on a transparent polyethylene panel or on a copper panel**, fixed to the lectern using screws or rivets. The screen-printed panel is not included in the supply and must be ordered separately.
