

Infusion pole h695_08

IV pole in stainless steel and aluminum. Number of hooks: 4. Height: from 1250 to 2100 mm. Brushed finish.

The infusion pole is one of the most common **medical devices** in hospitals and nursing homes. The product has an **essential but robust steel and aluminum structure** and is equipped with **4 hooks**. Each hook can hold up to **2 kg of liquid**, making it ideal for home use as well. The product has a height ranging **from 125 cm to 210 cm** and is therefore adjustable on multiple levels. The 5 wheels Ø 75 mm, 3 of which with brakes, ensure safe movement even in tight spaces.

Technical specifications:

- Outer tube dimensions: 25 x 1.5 mm
- Inner tube dimensions: 18 x 1.5 mm
- Height: 1250-2100 mm
- 5 Wheels Ø 75 mm (3 with brake)
- 4 Hooks
- Hook capacity: 2 kg
- Material: Stainless steel and aluminum
- Finish: brushed
- Compliant with DIN ISO 15375
