

Iron crate trolley h661_10

Iron crate trolley with puncture-proof wheels and non-slip handles. Load capacity 150 kg, ideal for safe and intensive manual handling.

The **iron crate trolley** is a professional tool designed for manual handling of heterogeneous loads in industrial and commercial contexts. The robust structure and ergonomic design allow for transporting heavy goods while significantly reducing the operator's physical effort. Thanks to the integration of **non-slip handles**, the grip remains firm and secure even during tilting and maneuvering in tight spaces. Equipping it with **puncture-proof wheels** ensures operational continuity, eliminating downtime caused by potential tire damage on uneven surfaces.

Technical features

- **Material:** high-strength iron
- **Grips:** ergonomic non-slip handles
- **Loading plate dimensions:** 350x260 mm
- **Load capacity:** 150 kg
- **Total structure weight:** 6.50 kg
- **Overall dimensions:** W.540 x D.500 x H.1280 mm
- **Wheel type:** puncture-proof
