

Ironing board Heated, vacuum and blowing system h13227

Ironing board Heated, vacuum and blowing completely made of metal for strength and stability. Working surface dimensions: 125x40 cm

Ironing board Heated, vacuum and blowing completely made of metal for strength and stability. Working surface dimensions: 125x40 cm.

Indispensable tool for perfect ironing and effortlessly, with high structural rigidity and robustness of components that make it suitable for use semiprofessionali. Completamente made of metal for strength and stability

The boiler support can be folded to save space and concealed laundry. Duct system for a more efficient extraction

Temperature of the heated surface controlled by a thermostat.

Foot pedal to operate the motor function of suction or blowing when necessary to preset the manual selector function.

Electrical outlet to connect directly to the control box of the boiler axis.

Shaft height adjustable in various positions.

Ironing board cover supplied complete with towel and flannel, specially designed to optimize the flow of air in both suction and blowing.

Anti-corrosion treatment of the worktop made of wire mesh for maximum breathability.

Specifications:

- Power output: 650W
- Power of heating (heating work plan): 600W
- Mains voltage: 230V-50Hz (120V-60Hz)
- Maximum load applicable to the socket: 2350W
- Working surface dimensions: 125x40 cm
- Dimensions axis closed: 155x21x56 cm

- Weight: 19 Kg
- Complete with ironing board cover
- Rugged metal construction
- Folding boiler support
- Duct system
- Foot pedal engine
- Height adjustable

INFORMATION

- **Height** 94,5 cm
- **length** 142 cm
- **Depth** 48 cm
