

Isotherm pool cover floats diameter 6,00mt h17428

Isotherm cover for pools floating round in shape with a maximum diameter of 6.00 meters. Italian production.

Isotherm pool cover floating for using during the summer season. The roof rests on the surface of the water with air bubbles in contact with water.

Thanks to the cover prevents water evaporation due to the heat in the middle of the day, reducing the need to top up the water.

It allows to keep the water clean while avoiding falling leaves and insects thus decreasing the time and cost needed for cleaning.

Specifications:

- for circular pools
- used for swimming pools with maximum dimensions of 6.00 m in diameter
- Italian production
