

IV pole for pediatric ward h44207

Pediatric IV stand in aluminum and multi-colored plastic. Adjustable height 1350-2000 mm, 4 safety hooks and mobile base on 50 mm wheels.

The professional IV pole has been specifically designed for integration into high-traffic healthcare settings, with a particular focus on **pediatric wards**. The structure combines the strength of aluminum with a welcoming chromatic design, aimed at reducing the visual impact of medical equipment and fostering a more comfortable atmosphere for small patients during their hospital stay.

Movement is made smooth by a five-star base with swivel wheels, while the telescopic system allows for precise adaptation to various clinical configurations, both for bedridden patients and for assistance during walking.

Technical features

- **Material:** Supporting structure in aluminum with technical plastic components
- **Chromatic design:** Light-resistant elements in red, black and yellow

- **Load capacity:** 4 independent hooks, suitable for bottles or bags up to 2 Kg each
- **Safety:** Rounded anti-trauma shaped hooks to prevent accidental injuries
- **Height adjustment:** Telescopic system from 1,350 to 2,000 mm
- **Stability:** Base with a diameter of 635 mm for an optimal center of gravity
- **Mobility:** Swivel wheels with a diameter of 50 mm
