

IV pole with walker support h634_68

Electropolished stainless steel IV pole with 5 wheels and 3 hooks, designed to integrate walking support and hospital mobility. This **professional IV pole** represents a multifunctional solution for hospital wards and clinics, designed to combine infusion therapy administration with mobility support. Made of **electropolished stainless steel**, the structure ensures high hygienic standards and resistance to frequent sanitization processes. The base configuration promotes patient independence, serving as a solid support during walking and facilitating the negotiation of small height differences or access to elevators in total safety.

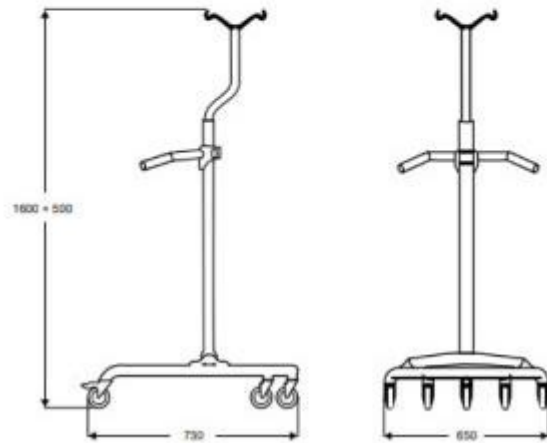

Technical features

- **Material:** Stainless steel with electropolished finish.
- **Hook configuration:** Equipped with 3 attachment points for bags and devices.
- **Movement system:** 5-swivel-wheel base for superior multidirectional stability.
- **Hygienic design:** Surface free of cavities and porosity to prevent bacterial contamination.
- **Logistics:** Stackable structure for space optimization during storage.
- **Certifications:** Compliant with ISO 9001:2015, ISO 13485:2016 (medical devices), and ISO 14001:2015 standards.
