

IV pole with wheels for nursing homes h44205

Professional chrome-plated steel IV pole, adjustable height 1300-2130 mm, 4 anti-trauma hooks and wheeled base for hospital environments.

The IV pole represents an essential solution for the administration of intravenous therapies in clinical and care settings. Designed to ensure maximum **structural stability**, it facilitates the management of infusion bags while allowing patient mobility within the healthcare facility. The chrome-plated steel structure ensures long operational life and superior resistance to daily mechanical stress.
