

IV pole with wheels h44203

Professional chrome-plated steel IV pole with 4 safety hooks, adjustable height (1350-2150 mm) and mobile base on wheels for healthcare use.

The **IV pole** represents an essential logistical support for the management of intravenous therapies in clinical and care settings such as hospitals, clinics, and nursing homes. Designed to combine structural stability and mobility, it allows healthcare staff to move infusion bottles in total safety, while ensuring patient comfort during movements.

The suspension system is entrusted to **4 hooks with rounded ends**, a technical solution specifically designed to eliminate the risk of accidental injury and prevent damage to the bags. The telescopic structure allows for a significant vertical travel, adapting to different ward configurations and specific therapeutic needs.

Technical characteristics

- **Material:** Chrome-plated steel with blue light-resistant technopolymer joining elements.
- **Hook configuration:** 4 safety hooks with a capacity of 2 kg each.
- **Height adjustment:** Telescopic system with range from 1350 mm to 2150 mm.
- **Base:** 635 mm diameter for an optimal center of gravity.
- **Mobility:** 5 pivoting wheels with 50 mm diameter.
- **Compliance:** Manufactured in compliance with the EN 60601 standard.
- **Warranty:** 2 years for manufacturing defects.
