

IV stand h624_11

AISI 304 stainless steel IV stand with hydraulic foot pump. 4 hooks (20kg), anti-tip base Ø67 cm, adjustable 150-220 cm.

This **professional IV stand** is designed specifically for the operating room environment and the secure support of infusion bags during clinical procedures. The integral structure in **AISI 304 stainless steel** with a satin finish ensures high resistance to corrosion and facilitates sanitation protocols. The lifting system is managed by a **hydraulic pump** with foot activation, which allows for smooth and precise height adjustment without direct manual intervention on the column, maintaining the asepsis of the operator's hands.

Technical features

- **Material:** Satin-finished AISI 304 stainless steel
- **Support:** 4 upper stainless steel hooks with a maximum capacity of 20 kg
- **Adjustment:** Hydraulic pump with non-slip rubber pedal
- **Height range:** Adjustable from 150 to 220 cm
- **Base:** 5-leg boxed-section anti-tip base with a diameter of 67 cm
- **Mobility:** 3 wheels with 90 kg dynamic capacity and 2 wheels with 70 kg capacity
- **Protection:** 5 rotating silicone rubber bumpers
- **Certifications:** UNI EN ISO 9001, 45001, 14001, UNI CEI EN ISO 13485, IATF 16949
