

IV stand with 4 hooks for hospitals h44209

Professional IV stand in stainless steel and plastic, 4 safety hooks, adjustable height and mobile base on 50 mm wheels.

The **IV stand** represents an essential device for setting up hospital wards, nursing homes, private clinics and specialist surgeries. Designed to guarantee maximum **safety and functionality** in supporting infusion bottles, this structure combines structural solidity and ease of movement.

The suspension system is equipped with **four hooks** with a load capacity of 2 kg each. The particular rounded geometry of the ends is designed to prevent accidental injury to healthcare personnel during load attachment and detachment operations. The main structure in **stainless steel** ensures mechanical strength and durability over time, while the plastic elements are made of polymers resistant to light degradation.

Technical specifications

- **Material:** Stainless steel and technopolymers
- **Configuration:** 4 safety hooks (capacity 2 kg per hook)
- **Height adjustment:** Telescopic, from 1,350 to 2,150 mm
- **Base:** Plastic, diameter 635 mm
- **Mobility:** 5 pivoting wheels with 50 mm diameter
- **Detail color:** Blue
- **Compliance:** EN 60601 standard
- **Warranty:** 2 years
