

IWB support with height-adjustable structure h557_02

Wall support for interactive whiteboard with manually operated height-adjustable structure.

Wall-mounted IWB support suitable for use in contexts of all kinds, from elementary schools to universities. Equipped with **structure for ultra-short throw projectors (0.19:1 ~0.4:1)** with **manual height-adjustable operation** operated via a hydraulic piston. The **projector can also be height-adjusted via a crank** with a micrometric mechanism. The support is **designed for use with the original Sanyo/Benq/Epson projector brackets**.

It is strongly recommended to combine the purchase of the support with the wall mounting bracket kit (see options).

Technical features:

- Material: light grey painted steel
- For ultra-short throw projectors (0.19:1 ~0.4:1)
- With manual height-adjustable operation
- With crank for projector height adjustment
- Bracket not included (original projector bracket must be paired)
- Mounting kit and instructions included

On request and upon quotation, also available in the version with basic structure
