

IWB support with manual structure h557_03

Wall mount for IWB with manual movement. Designed for ultra-short throw projectors (0.19:1 ~ 0.4:1).

Wall mount for interactive whiteboards ideal for schools and universities. Structure in **light grey painted steel**. Equipped with a **modular height-adjustable structure with manual operation** via hydraulic piston. Designed **for ultra-short throw projectors (0.19:1 ~ 0.4:1)**, and for use with the original brackets of Sanyo/Benq/Epson projectors. **The crank for micrometric adjustment is not provided.**

It is strongly recommended to purchase the wall mounting bracket kit along with the support (see options).

Technical features:

- Material: light grey painted steel
- For ultra-short throw projectors (0.19:1 ~ 0.4:1)
- With manual height-adjustable operation
- Bracket not included (it is necessary to use the projector's original bracket)
- Assembly kit and instructions included

Available upon request and subject to a quote also in the version with a base structure
