

Kit of 40 giant plastic bricks h735_05

Kit of 40 colored giant bricks h735_05 (26x13x7 cm). Made of non-toxic polypropylene certified UNI EN 71, ideal for psychomotor constructions and play paths in schools and kindergartens.

The **kit of 40 giant bricks h735_05** is an exceptional educational and play tool, designed to stimulate the creativity, manual skills, and motor skills of children. Made of **durable polypropylene plastic**, these bricks offer an extremely versatile play experience, making them ideal for psychomotor activities and creative constructions. The intelligent design features slots designed for the **easy and stable interlocking of hoops and rods**, allowing for the creation of complex obstacle courses and architectural structures in total safety. Thanks to the possibility of being weighted with water or sand, the bricks guarantee superior stability during active play, making them perfect for both indoor environments and outdoor use in schools, kindergartens, and sports centers.
