

Laundry trolley RSA h919_17

Steel laundry trolley with epoxy finish, 50x50x102 cm. Designed for dirty linen collection with an integrated lid.

The **laundry trolley** is a professional solution designed to optimize the workflow of healthcare workers within hospitals, clinics, and care homes (RSA). The structure is entirely made of **steel with an epoxy finish**, a treatment that ensures high mechanical resistance and effective protection against daily wear and tear. The integration of the **lid** allows for the organized management of temporary dirty textile storage, reducing odor dispersal and improving the decorum of patient areas.

Technical features

- **Dimensions:** W. 50 x D. 50 x H. 102 cm
- **Material:** Steel with epoxy finish
- **Configuration:** Equipped with a top lid
- **Intended use:** Collection and transport of dirty linen
- **Weight:** approximately 20.4 kg
