

Surgical scrub sink Corian 2 stations 164 cm h624_18

Two-station surgical scrub sink in Corian and AISI 304 stainless steel, 1640x625x1200 mm. Antibacterial surface and photocell sensors for maximum hygiene.

The **two-station surgical scrub sink** represents a standard of excellence for the filter zone of operating rooms and high-criticality hospital departments. Designed to ensure maximum hygiene for medical personnel, the device combines a **Corian** basin body — a non-porous material with **LGA antibacterial certification** — with a supporting structure and backsplash in **satin-finish AISI 304 stainless steel**. The absence of surface joints and the specific ergonomic frontal shaping minimize liquid stagnation and reduce splash dispersion, optimizing the microbiological safety of the healthcare environment.

The wall-mounted **suspended configuration** frees up floor space, facilitating room sanitization operations. Technical management is handled by a quick inspection system with a front panel equipped with **concealed magnetic couplings**, allowing immediate intervention on internal components without compromising the aesthetics and cleanliness of the surface.

Technical features

- **Dimensions:** L. 1640 x D. 625 x h. 1200 mm
- **Configuration:** Two-station (2 operator positions)
- **Basin body material:** High-resistance Corian with seamless surface
- **Structural components:** Anti-splash rear backsplash and cover panels in satin-finish AISI 304 stainless steel
- **Ergonomics:** Basin with frontal shaping for facilitated access
- **Inspectability:** Front panel openable with non-visible magnetic coupling devices
- **Filtration system:** Inspectable brass particle filters on hot and cold water delivery
- **Water connection:** Stainless steel flexible hoses compliant with DVGW (L. 1000 mm, ½" female thread)
- **Included accessories:** 2 photocell taps with mixer, 2 photocell soap dispensers (battery powered), 2 toothbrush holders
- **Compliance:** Product provided with CE declaration of conformity
