

Magnetic folding whiteboard h21905

Folding school whiteboard. Wall mounting. Dimensions: W200 x H100 cm.

Magnetic wing whiteboard suitable for presentations in offices, conference rooms, schools and universities. Ideal solution for those with space constraints; the structure consists of **a central board and two side boards that can be folded** and opened outwards when necessary. Made of **vitreous enamel steel** with an anodized aluminum perimeter frame. Designed for wall mounting. The board complies with CE safety directives and in particular with **UNI EN 14434/2005**.

Technical features:

- Dimensions: W200 x H100 cm
- Material: vitreous enamel steel
- Mounting: wall-mounted
- Modular wing structure (one central board and two side ones)
- Frame: in anodized aluminum

The product is available in the following colors:

- **white** - suitable for writing with felt-tip pens
- **green** - suitable for writing with chalk
- **gray** - suitable for writing with chalk

Special sizes and configurations are available upon request and quotation.
