

Lectern for public spaces h109_319

Single-sided lectern in painted galvanized steel for public spaces. Dimensions 55x30.6x108 cm. Laser-shaped structure, stainless steel hardware.

Lectern for urban furniture designed for public contexts such as gardens, parks and trails. Made with **sheet metal shaped using laser technology and subsequently bent**, this product combines practicality and durability. The structure is in **galvanized and powder-coated steel**, guaranteeing resistance to corrosion and atmospheric agents, while the hardware is entirely in **stainless steel** for prolonged longevity even in humid environments.
