

## Lectern for urban furniture h287\_383

Urban furniture lectern in shaped steel with CORTEN finish, 50x30 cm panel protected by 4 mm polycarbonate, floor-level anchoring for public spaces and nature trails.

The **H287\_383 lectern** is a robust and functional solution for **informative communication in public spaces**. Designed specifically for **parks, nature trails, historical areas, municipal gardens, and outdoor museum spaces**, it ensures long life even in outdoor environments exposed to atmospheric agents.

The **structure is entirely made of laser-cut shaped steel sheet**, a technology that ensures precision, clean aesthetics, and structural strength. The surface is treated with a **non-toxic thermosetting powder coating cycle**, which includes degreasing, drying, electrostatic painting, and oven curing at 180–200°C according to current regulations.

The **CORTEN color finish** provides a contemporary and sober appearance, integrable into both urban and natural contexts. The **50x30 cm information panel** is equipped with a **4 mm transparent compact polycarbonate protective sheet**, which protects the content from rain, sun, and light vandalism. The **floor-level anchoring** guarantees stable installation discretely integrated into the architectural context.

## Technical characteristics

- Structure: Laser-cut shaped steel sheet
- Finish: Non-toxic thermosetting powder coating
- Color: CORTEN effect
- Panel protection: 4 mm transparent compact polycarbonate sheet
- Total dimensions: W 50 x D 20 x H 120 cm
- Information panel dimensions: 50 x 30 cm
- Installation: Floor-level anchoring
- Use: Outdoor – urban furniture, tourist paths, public areas
