

Lectern for urban furniture in round steel tube h109_272

Galvanized steel lectern with round tube, 400x400 mm silk-screened panel, lower plate for logo, anchor bolt installation.

Professional lectern made of **round steel tube**, intended for public and institutional contexts where it is necessary to display information, notices, or communications in a stable and durable way. The structure combines display functionality with constructive robustness, suitable for fixed installations in open or covered spaces.

The front panel can be customized by means of **silk-screen printing** and is fixed to the structure using screws or rivets. In the lower part, a **galvanized steel sheet plate** is provided for the insertion of corporate or institutional logos. The entire structure undergoes **galvanizing and painting** treatment to ensure anti-corrosion protection and durability over time.
