

LED workshop lamp h1019_03

Rechargeable LED workshop lamp in impact-resistant plastic, 500 lumens, with articulated magnetic base and 360° hook for professional use.

The **LED workshop lamp H1019_03** is a professional lighting tool designed to ensure maximum operational efficiency in technical contexts such as mechanical workshops, service centers, and production departments. Thanks to its compact structure and the versatility of its fixing systems, it solves critical issues related to the lighting of engine compartments, electrical panels, and shadow zones in confined spaces, allowing the operator to work in total safety hands-free.

Technical characteristics

- **Lighting technology:** High efficiency SMD LED
- **Luminous flux:** Main 500 lm, Secondary spot 120 lm
- **Operating modes:** 3 intensity levels (Spot / 100% / 50%)
- **Color temperature:** 6500K (cool light for precision inspections)
- **Operating autonomy:** From 3 to 6 hours (front), up to 10 hours (spot)
- **Battery:** Integrated Li-Ion 3.7V / 2.5Ah
- **Charging system:** USB-C input (USB-A/USB-C cable included)
- **Charging time:** about 4 hours with status indicator
- **Mechanical resistance:** Protection degree IK07 (impact resistance)
- **Environmental protection:** IP20
- **Anchoring systems:** 2 rear magnets, 360° rotatable hook, 200° articulated magnetic base
- **Dimensions and weight:** 4.2 x 6.2 x 27.3 cm; 0.28 kg
