

Galvanized steel lectern h140209

Galvanized steel lectern for public spaces, 125x50x36 cm, painted metallic gray, with transparent polycarbonate reading surface and shaped lower plate.

Lectern designed to enhance and activate public spaces such as historical centers, streets, and squares. Made of galvanized steel with a kiln-painted finish, it represents an Italian-made design infrastructure dedicated to informative communication and reading in urban and monumental environments.

Technical specifications

- **Frame:** rear arches in 40 x 1.5 mm round galvanized steel tube; base plates in galvanized sheet metal for ground anchoring using anchor bolts and expansion plugs.
- **Reading surface:** 12/10 thickness galvanized sheet metal with a U-shaped galvanized profile perimeter border for inserting and locking the 3 mm thick transparent compact polycarbonate panel.
- **Plate:** shaped at the bottom for additional information.
- **Finish:** galvanized and kiln-painted structure with gunmetal epoxy powder (dark gray with metallic effect); alternative color finishes on request.
- **Lectern dimensions:** width 50 cm, height 125 cm, depth 36 cm, weight 17 kg.
- **Useful upper posting space:** width 30 cm, height 43 cm.
- **Useful lower posting space:** width 35 cm, height 8 cm.

Options available on request:

- High-resistance screen printing on compact polycarbonate with location descriptions, images, symbols, or monumental details according to customer specifications.
- High-resistance printed PVC sticker for Municipality name or sponsor applicable to the lower plate.
