

Termigea folding hospital bed h23056

Folding hospital bed in painted steel with crank-adjustable backrest. Space-saving foldable structure, ideal for home care. This folding hospital bed is a professional solution designed for home and clinical care, aimed at combining structural robustness with maximum logistical efficiency. The structure is **foldable in two sections**, a fundamental feature to facilitate transport and storage in small spaces. The adjustment of the backrest inclination occurs via a **removable chrome crank**, equipped with an end-of-travel stop to ensure maximum operational safety and prevent mechanical damage.

Technical features

- **Headboard and footboard:** made of white painted steel with cream-colored MDF wood protective panels.
- **Bed base and frame:** structure in tubular steel with electro-welded rod and transverse support bars.
- **Adjustment mechanism:** manual inclination of the backrest from 0° to 85° (± 5°) via crank.
- **Portability:** two-part folding frame with removable crank.
- **Headboard and footboard dimensions:** 92 x 85 cm (height calculated from the ground to the upper edge of the arch).
- **Open dimensions:** 205 x 85 x 50 cm (height measured from the ground to the supporting structure).
- **Closed dimensions:** 85 cm (W) x 22 cm (D) x 101 cm (H).
- **Net weight:** 35 kg.
- **Maximum user weight:** 135 kg.
- **Maximum supported load:** 170 kg (including mattress and accessories).
- **ISO classification:** 18.12.07.003.

Optional

- **Side rails:** pair of folding side rails in white painted tubular steel. Equipped with steel spring hooks coated in transparent plastic, they allow folding without the need for removal from the frame. Dimensions: 44 x 200 cm. Weight: 5.5 kg each.
