

Light blue foam arrow h999_27

Psychomotor arrow in polyurethane and non-slip PVC, 100x85x10 cm, designed for motor and coordination development in nurseries and preschools.

The **foam psychomotor arrow** is an educational module designed to support the motor and cognitive growth of preschool children (18-36 months). Inserted in educational contexts such as **nurseries and preschools**, its specific geometric shape stimulates spatial perception and movement planning. The soft internal structure cushions impacts, ensuring a safe play environment, while the technical coating ensures maximum hygiene in high-traffic contexts.

Technical features

- **Internal material:** polyurethane foam with density 25 Kg/m³
- **External coating:** non-slip, bite-resistant and antibacterial polyester PVC
- **Dimensions:** W 100 x D 85 x H 10 cm
- **Color:** light blue
- **Target use:** children from 18 months to 3 years
- **Safety:** complies with current European regulations for children's products
- **Maintenance:** surface washable with neutral detergents
