

Linear bike rack with sockets h859_23

Bike charging rack with graphic panel. Available in various colors. Dimensions: W.1180xD.390x H.1800 mm.

Electrified linear bike rack, ideal for creating parking and charging areas, thanks to the presence of stalls and 3 power sockets. The item is therefore ideal for outdoor areas of offices, shopping centers but also urban areas. **The steel structure** with provision for ground fixing is particularly resistant to wear and tear over time. **Charging takes place by connecting your own cable to the socket.** The sockets are always active and free of charge. To ensure greater safety, the item is equipped with 3 stalls with anti-fall support for all tire types up to 29" (MTB), **anodized steel security chain**, scratch-resistant rubber coating, instruction display for chain lock/unlock. The chain can be used upon insertion of a **1€ coin as a deposit or payment.**
