

Liquid collection tray h874_24

Sump tray for the safe storage of up to 4 x 60-liter drums, load capacity 1000 kg/m². Dimensions: W 910 x D 800 x h 225 mm.

The **h874_24 liquid collection tray** is the ideal solution for the management and safe containment of accidental industrial liquid spills. Designed to accommodate up to **4 x 60-liter drums**, this tray offers a safe working environment compliant with safety standards, while protecting the floor and the surrounding environment.

The structure is made of **3 mm steel sheet**, a highly resistant and durable material, perfect for industrial applications. The tray is equipped with a **galvanized grid** with a load capacity of **1000 kg/m²**, ideal for supporting heavy drums or bulky containers without compromising stability. Thanks to its height of **100 mm under the loading threshold**, it facilitates drum loading and unloading operations.

With a **collection capacity of 61 liters**, the tray is perfect for ensuring the containment of any leaks, respecting environmental regulations. The **RAL 5012** color finish gives a professional and distinctive look to the product, but, upon request and quotation, it can be customized with **different RAL colors** or you can opt for a fully galvanized version for greater resistance to atmospheric agents.

Thanks to its compact dimensions (**W 910 x D 800 x h 225 mm**) and low weight of **43 kg**, the tray is easily integrated into all types of workspaces, providing a functional and durable solution for the chemical, manufacturing, and other industrial applications.

Optimize the safety and organization of your industrial spaces with the **h874_24 collection tray**. Choose quality, resistance, and customization: **order now** and ensure a tailor-made product for your needs!

Technical features:

- **Dimensions:** W 910 x D 800 x h 225 mm
- **Maximum capacity:** 4 x 60-liter drums
- **Collection volume:** 61 liters
- **Material:** 3 mm steel sheet
- **Galvanized grid:** load capacity 1000 kg/m²
- **Height under loading threshold:** 100 mm
- **Weight:** 43 kg
- **Standard color:** RAL 5012
- **Available customizations:** different RAL colors or galvanized version on request and subject to quotation

User benefits:

- **Environmental protection:** ensures safe containment of any leaks and spills.
- **Structural resistance:** built in robust steel and galvanized grid for intensive use.
- **Flexibility of use:** storage for up to 4 drums, suitable for various industrial needs.
- **Adaptability:** available, upon quotation and request, in different colors or galvanized version for specific needs.
- **Manageability:** compact dimensions and low weight facilitate positioning and use.

FAQ:

1. **What types of liquids can be stored?**

The tray is designed to contain oils, solvents, and other non-corrosive liquids, after checking compatibility with the materials.

2. **Is the tray suitable for indoor and outdoor use?**

Yes, thanks to the robustness of the structure and the possibility of galvanization, it is ideal for both indoor and outdoor use.

3. **Is it possible to customize the tray?**

The tray is available in the standard configuration, but it can be customized with different RAL colors or full galvanization, upon quotation, for greater resistance.

4. **How is stability guaranteed during loading?**

The tray is equipped with a galvanized grid with a load capacity of 1000 kg/m², ensuring stability even with heavy loads.

5. **Can it be used with other types of containers?**

While designed for 60-liter drums, it is compatible with containers of similar dimensions, after checking stability.

Mini buying guide:

The **h874_24 liquid collection tray** represents an excellent choice for those who want a resistant and safe product for industrial liquid management. Thanks to its capacity to hold up to **4 x 60-liter drums**, this tray is ideal for workshops, warehouses, and industries that require practical solutions in compliance with regulations.

Made of high-quality steel and equipped with a galvanized grid, this tray offers superior strength and long-lasting durability. The **1000 kg/m²** load capacity ensures safe use even with heavy drums, while the customizable finish allows the product to be adapted to different aesthetic or functional needs. Before proceeding with the purchase, evaluate the available space and consider the customization options offered.

With the **h874_24 tray**, you will not only ensure the efficiency of your work environment but also guarantee maximum compliance with environmental safety regulations.
