

Liquid containment sump with perforated sheet h874_31

Mobile collection sump for industrial oils and liquids, designed to hold 2 x 60-litre drums, with an aluminum wall for tools. Dimensions: 875 x 500 x h 1685 mm.

The **h874_31 liquid collection sump** is an ideal solution for the safe storage and mobile filling of oils and liquids used in industrial environments. Designed to accommodate up to **2 x 60-litre drums**, it combines practicality and resistance in a compact and functional design.

The main structure is made of **3 mm steel sheet**, ensuring robustness and longevity even under intensive use conditions. The sump is equipped with a **galvanized grid**, designed to support up to **1000 kg/m²**, ideal for guaranteeing stability to the drums during filling and emptying operations.

A distinctive element of this sump is the presence of a **perforated aluminum wall**, characterized by a continuous grid with 10 mm square perforations. This configuration allows for easy positioning of accessories and tools, offering a highly practical organizational solution (tool holders not included).

The sump is completely mobile thanks to the **4 polyamide wheels** with a diameter of 100 mm: **two fixed** to ensure stability and **two swivel (one of which is equipped with a brake)** to facilitate transport in total safety. The **hot-dip galvanized push handles** complete the design, offering optimal control during movement.

With a **collection capacity of 60 litres**, this sump is ideal for preventing any spills, keeping the work environment clean. The **color is RAL 6011**.

Optimize storage and filling operations with the **h874_31 liquid collection sump**. Choose a robust, mobile, and versatile product for the safe management of industrial liquids. **Order now** and bring efficiency to your work environment!

Technical features:

- **Dimensions:** 875 x 500 x h 1685 mm
- **Collection volume:** 60 litres
- **Weight:** 56 kg
- **Maximum capacity:** 2 x 60-litre drums
- **Sump material:** 3 mm steel sheet
- **Galvanized grid:** load capacity 1000 kg/m²
- **Perforated wall:** aluminum with 10 mm square holes in a continuous 38 mm grid for free positioning of tool holders
- **Wheels:** 4 polyamide wheels Ø 100 mm (2 fixed, 2 swivel including 1 with brake)
- **Push handles:** hot-dip galvanized
- **Standard color:** RAL 6011

User benefits:

- **Optimal organization:** the perforated wall allows tools and accessories to be positioned easily.

- **Easy handling:** high-quality wheels and ergonomic handles facilitate transport.
- **Spill prevention:** adequate collection capacity to contain any liquid leaks.
- **Durability over time:** resistant materials and accurate processing guarantee a long useful life.
- **Versatility of use:** ideal for filling and storage operations in industrial environments.

FAQ:

1. **How many drums can this sump hold?**
The sump is designed to accommodate up to 2 x 60-litre drums in a vertical position.
2. **What are the advantages of the perforated wall?**
The perforated aluminum wall is perfect for the organized positioning of tool holders and accessories, making operations more efficient.
3. **Are the wheels suitable for industrial surfaces?**
Yes, the polyamide wheels are designed to ensure smooth and stable movement even on industrial surfaces.
4. **Is the sump suitable for hazardous liquids?**
Yes, it is designed to contain any spills, reducing environmental risks and improving safety.
5. **Can I request a different color for the sump?**
Yes, upon request and subject to a quotation, other RAL colors or a galvanized finish for greater protection are available.

Short buying guide:

The **h874_31 liquid collection sump** represents a reliable and versatile solution for managing liquids in an industrial setting. Designed to hold **two 60-litre drums**, this sump offers a robust and safe structure, with high-quality materials such as steel and aluminum.

Before proceeding with the purchase, evaluate the specific needs of your working environment. This model is ideal for filling and storage operations, thanks to the high-load **galvanized grid** and the **perforated wall** for accessories.

Investing in the **h874_31 sump** means choosing a product that combines efficiency, safety, and practicality. An indispensable addition to ensure order and protection in industrial contexts.
