

Liquid containment tray h286_57

h286_57 welded steel storage tray for 4 drums. Dimensions 250x80x40 cm, capacity 400L, palletized structure and removable tubular supports.

The **h286_57 storage tray** is designed to ensure maximum safety in the **containment of polluting liquid substances**. Intended for industrial contexts where drum management requires precision and environmental compliance, this solution prevents the dispersion of harmful substances into the soil. The structure, made of **robust sheet steel** and watertight welded, ensures prolonged operational stability even in heavy-duty work environments such as workshops, warehouses, and chemical industries.

Technical features

- **Material:** thick sheet steel with watertight welding
- **Sump capacity:** 400 liters
- **Storage capacity:** configuration for four drums in a vertical position
- **Dimensions:** L 250 x W 80 x H 30 (+ 10 cm handling supports)
- **Handling:** palletized monobloc structure for use with forklifts and pallet trucks
- **Components:** removable painted tubular supports to facilitate cleaning of the bottom
- **Finish:** oven-baked powder coating in Blue RAL 5010, resistant to chemical agents and corrosion
