

Liquid storage sump pallet for 4 drums of 200 lt h874_35

Liquid containment sump pallet, ideal for storing up to 4 drums of 200 liters in a vertical position. Dimensions: 2400 x 800 x h 285 mm. Collection volume: 233 lt.

The **h874_35 storage sump for 4 x 200 lt drums** is designed to offer a safe and reliable solution in the management and containment of industrial liquids. The **maximum capacity of 4 drums of 200 liters** makes this sump an excellent choice for those who need large volume storage in production or logistics environments.

Built in **3 mm steel sheet**, it guarantees robustness and resistance to mechanical stress, making it ideal for intensive use. The **conical design** and the **profiled edges on both sides** ensure greater structural stability, while the **height of 100 mm under the base** facilitates lifting and transport by **pallet truck or forklifts**.

The sump is equipped with a **galvanized grid**, designed to support a **maximum load of 100 kg/m²**, ensuring safety and practicality during use. Made in **RAL 3000** color, it offers high visibility in industrial contexts.

Don't sacrifice safety in industrial liquid storage! The **h874_35 sump** is the ideal solution for practical and efficient management. **Buy now** to optimize your workspace!

Technical features:

- **Dimensions:** 2400 x 800 x h 285 mm
- **Collection volume:** 233 lt
- **Maximum capacity:** 4 drums of 200 lt
- **Material:** 3 mm steel sheet
- **Grid capacity:** 100 kg/m²
- **Height under the base:** 100 mm
- **Weight:** 114 kg
- **Color:** RAL 3000
- **Handling:** compatible with pallet trucks and forklifts

User benefits:

- **Large capacity:** Supports up to 4 drums of 200 liters to handle large volumes.
- **Guaranteed robustness:** Built in 3 mm thick steel, resistant and durable.
- **Facilitated transport:** The raised base allows for simple and safe movement.
- **Effective drainage:** The galvanized grid allows for optimal liquid management.
- **Adaptability:** Ideal for use in various industrial sectors.

FAQ:

- 1. What is the primary intended use of this sump?**
It is designed for the containment of industrial liquids and to prevent spills during the storage of large volumes.
- 2. Is it easy to move?**
Yes, the sump has been designed to be compatible with pallet trucks and forklifts, ensuring ease of transport.
- 3. What materials are used in its construction?**
The structure is entirely made of 3 mm steel sheet, with a galvanized grid for high resistance and durability.
- 4. What is the maximum containment capacity?**
The sump can hold a maximum volume of 233 liters, supporting up to 4 drums of 200 liters each.
- 5. Can it be used indoors and outdoors?**
Yes, it is ideal for both indoors and outdoors, with the possibility of adding galvanizing treatments for greater protection from atmospheric agents.

Mini buying guide:

The **h874_35 storage sump** represents a reliable choice for those seeking a robust and practical solution for industrial liquid management. Its **large containment capacity** and **reinforced design** make it an indispensable product in environments with

high storage needs. Before purchasing, verify the dimensions and space available for installation.

Thanks to the **galvanized grid** and the high-quality **steel structure**, this sump guarantees resistance and safety for daily use. The ability to easily transport it with pallet trucks or forklifts makes it perfect for production and logistics environments, offering effective liquid management with a long-lasting investment over time. Choose the **h874_35 sump** for safety, practicality, and durability in your industrial processes!
