

Liquid storage sump with perforated sheet metal h874_32

Mobile sump for industrial liquid collection, for the containment of 1 x 60-liter drum, equipped with perforated sheet metal. Dimensions: 570 x 590 x h 1775 mm. Collection volume: 60 lt.

The **liquid storage sump h874_32** is a practical and safe solution for the filling and management of oils and liquids used in industrial environments. Ideal for housing **1 x 60-liter drum**, this model combines **functionality and robustness** in a **compact structure**, perfect for limited spaces.

The sump is made of **3 mm thick steel sheet**, guaranteeing exceptional resistance over time. It is equipped with a high-capacity **galvanized grate**, capable of supporting a weight of up to **1000 kg/m²**, ensuring stability and safety during loading and unloading operations.

A distinctive feature is the **perforated galvanized steel sheet**, designed with a continuous grid of 10 mm square holes. This solution allows for the efficient organization of tools and accessories necessary for work, improving on-site operations (tools and accessories are not included).

Thanks to the **high-quality 100 mm diameter polyamide wheels**, the sump guarantees easy and safe movement. The system includes **2 fixed wheels** for stability and **2 swivel wheels**, one of which is **equipped with a brake**, for optimal control. The

hot-dip galvanized push handles further facilitate transport, making the equipment perfect for dynamic environments.

With a **collection volume** of **60 liters**, this sump prevents any leaks and spills, keeping the work environment safe and clean. The finish is in **RAL 3000**, but upon request and subject to a quote, other colors or a galvanized version can be requested to increase corrosion resistance.

Simplify storage and filling operations with the **h874_32 sump**. A compact, versatile, and safe product for the needs of the industrial sector. **Order now** and improve your productivity!

Technical features:

- **Dimensions:** 570 x 590 x h 1775 mm
- **Collection volume:** 60 liters
- **Weight:** 52 kg
- **Maximum capacity:** 1 x 60-liter drum
- **Sump material:** 3 mm steel sheet
- **Galvanized grate:** capacity 1000 kg/m²
- **Perforated wall:** aluminum with 10 mm square holes in a continuous 38 mm grid for free positioning of tool holders
- **Wheels:** 4 polyamide wheels Ø 100 mm (2 fixed, 2 swivel of which 1 with brake)
- **Push handles:** hot-dip galvanized
- **Standard color:** RAL 3000

User benefits:

- **Simplified organization:** the perforated wall allows for the efficient organization of tools and accessories.
- **Easy movement:** high-quality wheels and ergonomic handles for effortless portability.
- **Leak prevention:** the sump design ensures the safe collection of any liquid spills.
- **Strength and longevity:** robust materials and anti-corrosion treatments ensure a long service life.
- **Adaptability:** perfect for multiple industrial applications, thanks to its compact and functional structure.

FAQ:

1. **What is the maximum capacity of the grate?**
The galvanized grate is designed to support loads up to 1000 kg/m², ensuring stability and safety.
2. **How is the transport of the sump facilitated?**
The sump is equipped with ergonomic push handles and polyamide wheels, including one swivel wheel with a brake, to ensure simple and safe movement.
3. **How many drums can this sump hold?**
This model is designed to hold 1 x 60-liter drum in a vertical position.
4. **Is the structure resistant to corrosive environments?**
Yes, thanks to the steel sheet and galvanization, the sump offers excellent protection against corrosion.
5. **Is it possible to customize the color of the sump?**
Yes, upon request and subject to a quote, other RAL colors or a galvanized model for greater protection are available.

Mini buying guide:

The **h874_32 liquid collection sump** is a **reliable and compact solution** for safely managing industrial oils and liquids. Designed to hold **one 60-liter drum**, it stands out for its robustness and versatility. The **perforated sheet metal** offers practical support for tool organization, while the high-quality wheels ensure easy movement even in the most demanding work environments.

Before purchasing, consider your space specifications and operational needs: this sump is ideal for operations requiring **mobility and organization**. With **high-quality materials**, it represents a smart choice to improve the safety and efficiency of your work environment.
