

Location marker totem h140_445

Single-sided “You are here” totem for urban furniture in galvanized steel. Dimensions: W. 65 x D. 48.5 x h. 201 cm.

Single-sided totem for urban furniture with an innovative design, designed to highlight the exact coordinates of the place where the user is located at that precise moment. Its shape, in fact, reproduces the silhouette of the “marker” of multimedia maps. Its structure is composed of a **central body**, consisting of a box section made of **30/10 thick galvanized sheet metal** and a **100/10 thick galvanized sheet metal base with holes for ground fixing**; **2 shaped upper panels, in 30/10 thick galvanized sheet metal** and obtained from high-definition plasma cutting; **2 lower panels**, for decorative purposes, **in 30/10 thick shaped galvanized sheet metal** obtained from high-definition plasma cutting; **front “marker” shaped element**, composed of a shaped support, **in 100/10 thick galvanized sheet metal**, equipped with a base incorporated into the base of the totem. The front panel is prepared for the reproduction through high-resistance silk-screen printing (not included) of the description of the place or monument. The particular arrangement of the elements that make up the totem allows the identification of the coordinates described on the central body (graphics not included) through the central hole of the marker. The product is **treated with anti-corrosive and painted with thermosetting powders oven-baked**, in the colors **mouse grey RAL 7005** for the central body, **silver grey RAL 7001** for the upper and lower panels and **traffic red RAL 3020** for the marker.

Technical characteristics:

- Single-sided
- Dimensions: W. 65 x D. 48.5 x h. 201 cm
- Base width: 50 cm
- Material: galvanized steel painted with thermosetting powders and treated with anti-corrosive
- Central body color: mouse grey RAL 7005
- Upper and lower panels color: silver grey RAL 7001
- Marker color: traffic red RAL 3020
- Central body in 30/10 thick galvanized sheet metal
- Base in 100/10 thick galvanized sheet metal
- 2 shaped upper panels in 30/10 thick galvanized sheet metal
- 2 lower panels in 30/10 thick galvanized sheet metal
- Front “marker” shaped element in 100/10 thick galvanized sheet metal with base incorporated into the base of the totem
- All graphics are not included

- Ground fixing
- Certifications: UNI EN ISO 9001:2015; UNI EN ISO 3834-4:2006

**Images are purely indicative.*

INFORMATION

- **Material** metallo
- **typology** monofacciale
- **Fixing** su palo
- **Height in millimetres** 2010.000000
- **Width in millimetres** 650.000000
- **Depth in millimetres** 485.000000
