

Logic egg game 120 pieces h821_08

Plastic educational set for logical-mathematical development. Includes 120 colored eggs, 4 trays and 18 progressive difficulty cards (3-6 years).

The **egg game set** is an advanced educational tool designed to support active learning in preschools and play centers. The system is designed to stimulate the **logical, mathematical and creative skills** of the child through a manipulative approach that also promotes socialization and sharing of group activities.

The modular structure of the set allows for differentiated educational paths based on the age group, starting from color recognition up to solving geometric problems and elementary mathematical operations. The inclusion of a **teacher's manual** guarantees constant methodological support in lesson planning.

Technical specifications

- **Material:** High-density resistant plastic
- **Components:** 120 eggs divided into 4 colors (30 eggs per color)
- **Included accessories:** 4 white honeycomb trays for housing
- **Educational supports:** 18 illustrative cards with progressive difficulty
- **Card breakdown:** 6 pictorial (3-5 years), 6 geometric (4-5 years), 6 mathematical (5-6 years)
- **Set dimensions:** 25.5 x 29.5 x 4 cm
- **Egg height:** 6.5 cm
- **Age target:** From 3 to 6 years
