

## Luggage trolley with basket h2271

Stackable airport trolley in galvanized and painted steel. Equipped with basket, ring bumper and differentiated wheels. Robust and space-saving.

The **luggage trolley with basket** is a technical solution designed specifically for managing passenger flows in **airports, railway stations and large logistics hubs**. Made with a robust **galvanized steel tube structure** and protected by a transparent coating, this trolley solves the problem of intensive movement of heavy luggage in outdoor and indoor environments subject to high wear. Its main feature is the **stacking capacity**, which allows for optimization of storage spaces in parking areas. The design includes a practical basket for small objects and a stable loading base, protected at the front by a **corner bumper** that safeguards architectural structures and users' legs during use.

## Technical features

- Galvanized steel tube structure with transparent paint protection
- Stackable design for space optimization (space-saving)
- Integrated storage basket
- Front rubber ring bumper
- 4-wheel system: 2 fixed and 2 swivel
- Rear wheel diameter: 20 cm
- Front wheel diameter: 12.5 cm
