

## Market display counter h757\_14

Inclined counter with 35x20 profile and 65 kg/m<sup>2</sup> load capacity, ideal for fruit, vegetables and flowers. 2 independent front feet. Top dimensions: 60 x 150 cm.

The **h757\_14 inclined market counter** is designed to ensure an optimal display of **fruit, vegetables and flowers** in markets and fairs. The structure made with **35x20 mm steel profile** and **50 mm oval tubes** provides robustness and durability even for intensive use. The **two independent front feet** and legs inclined at a **98° angle** ensure excellent stability, preventing accidental tipping during use.

The **special profile edge** and the **die-cast aluminum safety rounded corners** offer greater safety for operators and customers. The surface of the **60 x 150 cm** loading top is spacious and allows for an orderly and clearly visible arrangement of products. The structure is assembled with **bolts** to ensure greater solidity and resistance over time.

Thanks to the **65 kg/m<sup>2</sup> load capacity**, this counter is suitable for supporting substantial loads of fruit, vegetable and floral products. Its structure is completely **recyclable**, representing a sustainable and ecological choice for market operators.

Take your display to the next level with the **h757\_14 inclined counter**! Reliability, safety and practicality for markets and fairs. **Buy now** and offer your customers an impeccable presentation!

### Technical features:

- **Top dimensions:** 60 x 150 cm
- **Rear foot height:** 86.5 cm

### FAQ:

1. **What materials are used for the counter structure?**

The structure is made with 35x20 mm steel profile and 50 mm oval tubes, guaranteeing solidity and durability over time.

2. **Is the counter suitable for indoor use?**

Yes, the counter is perfect for indoor markets, fairs and exhibitions, thanks to its stability and practical design.

3. **Can this counter be used for displaying flowers?**

Certainly, its robust structure and inclined top make it ideal also for displaying plants and flowers.

4. **How do you keep the support surface clean?**

Simply use a damp cloth with non-aggressive detergents to keep the loading surface clean and preserve its appearance.

5. **How much weight can the counter support?**

The counter has a maximum load capacity of 65 kg/m<sup>2</sup>, making it suitable for displaying fruit, vegetables and other products of moderate weight.

### Buying guide:

The **h757\_14 inclined market counter** is a reliable solution for those looking for a robust, stable and safe surface for displaying fruit, vegetables and flowers. Thanks to its **steel structure with 35x20 mm profile**, it guarantees a load capacity of **65 kg/m<sup>2</sup>**, ideal for heavy loads. The **safety rounded corners** increase safety, while the inclined design and **2 independent front feet** ensure greater stability.

This counter is perfect for operators in the fruit and vegetable sector, local markets, fairs and specialized shops. It is also a sustainable choice, being completely **recyclable**. Before purchasing, check the available space and the quantity of products to be displayed to ensure it meets your operational needs.
