

Market display stall for exhibition h757_11

Fruit display stall with a lightweight structure, ideal for reduced loads. Surface dimensions: 100 x 150 cm. Capacity: 40 kg/m². Recyclable.

The **h757_11 fruit display stall** is designed to offer a **practical and functional solution** to those needing to display fruit, vegetables, and flowers in markets, shops, and trade fairs. Thanks to its **30x18 mm profile** structure and **40 mm oval slats**, this stall combines lightness and stability, making it ideal for supporting **lighter loads** up to a maximum capacity of **40 kg/m²**. The **special profile edge** helps keep displayed products well-positioned, avoiding accidental slips and ensuring a neat and safe presentation.

The different height of the feet – **86.5 cm for the rear foot** and **64 cm for the front foot** – allows for an optimal inclination of the **100 x 150 cm** loading surface, facilitating better visibility of the displayed products. This inclination is particularly useful for enhancing the freshness and attractiveness of fruit and vegetables, making them more visible to customers and encouraging purchase. The stall is made **without reinforcement** on the surface and the two front legs.

The stall structure is **fully recyclable**, a sustainable choice that meets the needs of those who are environmentally conscious. This makes it an ecological and versatile solution for temporary or permanent displays. Its lightness and practicality allow for easy transport and positioning, adapting perfectly to different space and configuration needs.

Thanks to its features, the **h757_11 display stall** is a perfect choice for those looking for an effective, economical, and durable solution to display fruit, vegetables, and other fresh products, always ensuring excellent presentation and simple management.

Renew your display space with the **h757_11 stall**, a practical and lightweight solution for markets and shops. **Buy now** to make the most of your products!

FAQ:

1. **What are the dimensions of the loading surface?**

The loading surface measures 100 x 150 cm, an ideal area for displaying fruit and vegetables in an organized way.

2. **Is the stall resistant to outdoor use?**

Yes, the steel structure is designed to withstand moderate outdoor conditions if positioned in covered areas.

3. **What guarantees the stability of the stall?**

Stability is guaranteed by the solid 30x18 mm profile structure and robust legs, designed to support loads up to 40 kg/m².

4. **What materials are used for the structure?**

The structure is made of 30x18 mm profile and 40 mm oval slats, offering lightness and stability for moderate loads.

5. **What is the load capacity of the stall?**

The stall can support a maximum load of 40 kg/m², suitable for displaying fruit, vegetables, and other lightweight products.

Mini buying guide:

The **h757_11 fruit display stall** is perfect for those needing a functional and lightweight solution for markets and greengrocers. The simplified structure and **40 kg/m²** capacity make it suitable for reduced loads, while the inclination of the surface facilitates optimal product viewing. Made with **recyclable** materials, it is a sustainable choice for temporary or permanent displays. If you are looking for a practical, economical, and easy-to-manage stall, this model is the ideal solution.
