

Market stall profile 30x18 h757_34

Lightweight stall with double inclined shelf for euro crates. Dimensions: W 150 x D 120 x H inclined shelf foot 70 and H lower shelf foot 63 cm.

The **market stall H757_34** is a practical and compact solution, designed for itinerant exhibitors and fruit and vegetable operators who need a lightweight yet functional stall, perfect for selling **euro-format fruit crates** in confined spaces.

The structure is made with a **thin and light 30x18 mm profile** and **50 mm oval profiles**, with a **special profile edge** that gives stability to the frame while maintaining the stall's maneuverability.

The **reinforced hinges** guarantee greater resistance to wear and frequent opening/closing, making it suitable for daily use in dynamic environments such as **local markets, festivals, and fairs**.

The stall is **assembled using bolts** and features **rounded safety corners in die-cast aluminum**, which offer greater safety during handling and use.

One of the most interesting features of this model is the **double display surface**: an **inclined surface of 120 x 150 cm** (foot height: 70 cm) and a **lower surface of 80 x 150 cm** (foot height: 63 cm).

This configuration allows to **maximize display space** on multiple levels while maintaining a **minimum footprint**, ideal for those operating in small spaces.

Buy now the **H757_34 stall** for your markets: more display in less space. Request a quote for multiple supplies!

Technical characteristics:
