

Market stall with fiberglass h757_32

Inclined fiberglass stall for light loads. Dimensions: L 150 x D 120 x Rear foot H 86.5 cm and Front foot H 64 cm.

The **H757_32 market stall** is a solution designed specifically for the display of **fruit and light products** in street vending contexts, open-air markets and fairs. Its structure, compact and functional, is designed for those looking for a **simple, practical and easy to assemble** stall, suitable for temporary and frequent exhibitions.

Made with a **30x18 mm profile** and **40 mm oval tubes**, the stall features a lightweight structure, without reinforcements on either the top or the two front legs. This makes it **suitable for supporting light loads**, with the advantage of **superior maneuverability** and a **low weight**, ideal for those working on the move or needing to set up the station quickly.

The **special profile edge** and the **insert profile** ensure adequate stability, while the top with **blue heat-bonded fiberglass** guarantees a surface that is **hygienic, easy to clean and moisture resistant**. The model shown in the photos does not include the fiberglass, but the **fiberglass** is nonetheless **included in the supply** of this **model**.

The stall features an **inclined configuration**, thanks to the difference in height between the rear foot (86.5 cm) and the front foot (64 cm), designed to improve the **visibility of the displayed products** and facilitate access by customers.

Buy the **H757_32 market stall** now: practicality and functionality for light display. Request a quote for bulk supplies.
