

Market stall with reinforced hinges h757_33

Stable stall with reinforced hinges and independent feet. Dimensions: W 150 x D 120 x H rear foot 110 cm and H front foot 70 cm.

The **H757_33 market stall** has been designed to guarantee **stability, resistance and safety** during the display of **fruit, vegetables and flowers**, both in outdoor markets and in trade fair or street vending contexts.

Made with a **30x18 mm profile** and **50 mm oval profiles**, it is equipped with a **special profile edge** and **insert profile**, features that provide strength to the frame while maintaining a manageable structure.

One of the distinctive elements of this stall is the presence of **reinforced hinges**, designed to ensure safe opening and closing even after prolonged and frequent use. The **assembly via bolts** ensures stable and long-lasting mounting.

The stall features **safety rounded corners** in **die-cast aluminum**, designed to offer greater safety during handling and use in crowded environments.

The **slanted configuration of the top**, obtained thanks to the difference between the height of the back foot (110 cm) and the front foot (70 cm), improves product visibility, facilitating sales and making the display more attractive.

The **structure is completed by two independent front feet**, which, together with the **98° angle leg opening**, provide excellent balance and stability even on uneven surfaces.

Choose the **H757_33 stall** for a solid and professional workstation. Order now or request a personalized quote for multiple orders.
