

Market stall without step h757_37

Lightweight slanted aluminum stall for euro crates. Dimensions: 120 x 150 x H rear leg of slanted surface 145 and H front leg of slanted surface 74.

The **H757_37 market stall** is designed for the orderly and effective display of **euro fruit crates**, offering a **slanted, lightweight, and functional** structure, ideal for local markets, fairs, and street vending contexts.

Built with a **slim and lightweight 30x18 mm aluminum profile**, it is equipped with **50 mm oval tubes** and a **10 mm round tube**, a combination that guarantees **structural strength and ease of handling**.

The stall is **assembled via bolts**, with **reinforced hinges** that ensure stable and durable opening even with intensive use.

The **special profile edge** and the **insert profile** increase frame rigidity, while the **safety-rounded die-cast aluminum corners** offer high operational safety in crowded environments.

The **slanted configuration of the surface** allows for an optimal presentation of the goods, thanks to the height difference between: **rear leg 145 cm** and **front leg 74 cm**.

With dimensions of **120 x 150 cm**, the stall offers a **large yet space-saving display surface**, ideal for those with limited space but who do not want to sacrifice an orderly and accessible arrangement of crates.

Order the **H757_37 stall** now: ideal for markets with slanted display and lightweight structure. Request a quote for multiple supplies.

FAQ:

1. **Is the stall suitable for displaying fruit crates?**

Yes, it is designed for euro crates, perfect for fruit and vegetables.

2. **Does the stall have a step?**

No, this model is without a step, with a single slanted surface.

3. **What is the inclination of the surface?**

The inclination is obtained by a height difference: 145 cm at the back, 74 cm at the front.

4. **Is it stable on uneven surfaces?**

Yes, thanks to the reinforced hinges and bolted structure, it maintains stability.

5. **Is it suitable for outdoor use?**

Yes, the lightweight aluminum structure makes it perfect for outdoor markets.

Mini buying guide:

The H757_37 model is the ideal solution for those participating in **markets and fairs**, where a **lightweight, stable, and space-saving** stall is needed.

The **120 x 150 cm slanted surface**, with heights of 145 cm and 74 cm, ensures an orderly and well-visible display of fruit crates.
